- ...And much more!

The sailing boat «ARGELVOR»: ASFL's research polar boat adapted for scientific field work all year around!

Experience:

Our team members are highly skilled in managing field research campaigns. They have broad experience in leading field-based projects for universities, lab and governmental agencies, and are qualified in logistics management and scientific sampling.

Strategies:

Our objectives are to build a tight collaboration with our partners from the initial phase of the studies, and to adjust our involvement to your needs, from providing expert field personnel for your sampling to complete management of your field campaign.

They have trusted us:
